**\* requires non-resident AIS watercraft sticker/fee before launching**

**EXPECT YOUR WATERCRAFT TO BE INSPECTED**  
**CLEAN, DRAIN, DRY**

# Western States and Provinces Watercraft Inspection Contacts

Credit: Nevada Dept. Wildlife

Aquatic invasive species, such as zebra and quagga mussels, pose a threat to the economy and natural resources of western states and provinces. Anyone who uses water – for work or play – can help stop the spread of invasive species, which can be transported by watercraft, trailers, and other water-related equipment (e.g., anchors, ropes). States and provinces are staffing watercraft inspection stations throughout the West to ensure you **Clean, Drain, Dry** your watercraft before you launch.

Follow these simple steps:

**Clean** - Remove all plants, animals, and mud, and thoroughly wash everything, especially all crevices and other hidden areas.

**Drain** - Eliminate all water before leaving the area, including wells, ballast, and engine cooling water. Pull the drain plug!

**Dry** - Allow sufficient time for your watercraft to completely dry before launching in other waters.

Before leaving and before launching...  
**inspect everything!**

---

## Know before you go!

**Unsure if your watercraft has been in water with known invasive species? Or whether there are specific (invasive species) jurisdictional requirements at your destination? See the back of this card for agency contact information.**
